

Clark Forklift Part

Clark Forklift Parts - At present, there are over 350,000 Clark lift trucks performing worldwide, and in excess of 250,000 in commission in North America alone. With five major lines across the world, Clark is proud to be one of the most expansive organizations in the industry. Heavy duty vehicles ranging from 1,500lb to 18,000lb capacities, dual fuel, gasoline, LPG, hand-driven lift trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift, handles more than 120,000 particular parts built for 20 exclusive brands of lift trucks and automated equipment. Your regional Clark Seller is your complete source for availability of all your parts requirements provided by Clark Totalift.

Clark's phenomenal Parts Distribution Centers are conveniently located in Louisville, Kentucky, which serves both their clients and sellers in North America, and Changwon, South Korea, which handles their Asian sellers and consumers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing manufacturers. Driven to supply the highest level of value and service to our users, Clark remains on the cutting edge when it comes to improving productivity and benefiting performance.

Clark Totalift has a very outstanding intercontinental support network. With over 550 locations worldwide, dealer representation in over 80 nations and 230 locations in North America, their high level of commitment to their customers predominates the material handling market.

By revolutionizing the operator restraint system protection feature, Clark proudly remains a leader of refinement in the industrial equipment and automated lift truck industry. This exceptional dedication to safety is currently a standard feature on every forklift.

Clark's relentless mission to boast the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 - Clark, is the first forklift maker across the world to be certified with the internationally accepted quality standard ISO 9001 for all of their production plants. Also, the ISO 14001 Environmental Management System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be prepared for any number of environmental restrictions, thus placing them in a dominant industry position.

Clark has chosen the structure of "Lean Manufacturing" at all of its assembly facilities because this technique is extremely economical and enables minimal use of resources. Developed to guarantee maximum efficiency, this system is designed to discover and acknowledge the most effective methods for manufacturing facility stewardship. Clark has concluded this transition of its Korean plant. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and production efficiencies.

By working in concert, Clark's product suppliers and engineers communicate towards improving product effectiveness while minimizing costs. The new value engineering agenda combines modern product improvement and offers improved client support and service within the industry.
