

Aerial Work Platform

Aerial Work Platforms - There are lots of accessories for forklifts which could be used so as to help expand the functionality of your lift truck and allow you to lift objects, handle materials with out difficulty or to accomplish clean-up tasks.

Lots of the accessories are specifically designed to be able to fit on the blades themselves. Fork extensions for example, are used when you require more blade length, which increases lifting capability. Fork extensions come in lengths ranging from forty eight to one hundred twenty inches. Triangular or rounded attachments are one more kind utilized if moving rolled material so as to make certain it does not roll off of the standard flat blades.

Lifting accessories could be pivoting and telescoping crane accessories. They come in various kinds. These attachments are normally used for moving lumber, metal bars, poles or any type of bulky stuff. Additional attachments such as other kinds of hook plates and hooks are offered in order to carry objects using a chain or sling. Slab lifters and magnetic lifters are other items that could be used together with hook attachments. Slab lifters are specialized accessories which are intended for picking up different materials that are delivered in a sheet or slab format. Rug rams or carpet poles are other lifting tools that attach to your lift truck to be able to make transporting rolls of carpet much easier. The accessory hooks onto the lift truck's forks and has a pole that goes through the center of the carpet roll.

There are several different types of lift truck attachments that can be used for facility maintenance like for instance snow forks. These blades connect to front end loaders and could transport materials like for example soil, snow and dirt. Other common cleanup attachments consist of standard sweepers and magnetic sweepers. Standard sweepers consist of a broom that the lift truck forks connect onto for sweeping big spaces like for instance factory floors, parking lots and warehouse. The magnetic sweeper is the same except that it has a magnetic plate instead of bristles. The magnetic sweeper is used in areas where there is lots of metal fragments such as on shop floors for example. Sweepers have widths up to sixty inches and this surface area makes clean up effortless and quick.

A material spreader is another forklift attachment that is usually utilized at facilities. These spreaders are handy for various applications like for instance spreading rock salt, pellets, fertilizers, insecticides, seed and ice melt.

Work platforms are another optional lifting accessory which many companies utilize day after day. The platforms range in size from 36" x 36" to up to 60" x 60". There are a few units available which are capable of folding up and storing into a smaller space. Work platforms are designed to raise staff up to an overhead location with the use of the lift truck. Larger platform units have added space for workers to be able to carry tools and other essential things meant for the job. Usually work platforms are constructed of poly material or steel.
