

JLG Forklift Part

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora embarked on a cross country trip in their RV. Recently retired, after spending numerous years working with his brother to develop their crane company into an industry leader, John had no idea that momentous trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling equipment was the end result of a road expedition.

During their trip, John reacquainted himself with past business associates along the way. In combination with these conversations and a significant event; two workers were unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered an infinite marketplace for a product that could quickly and safely elevate individuals in the air to accomplish maintenance and other building services.

Following their return from holiday, John set up a partnership with two of his friends and obtained a metal fabricating company in McConnellsburg, Pennsylvania. Starting with a small crew of twenty staff, they produced and sold their first JLG aerial work platform in 1970. The company incorporates many of the simple design elements of that original lift into current designs.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove returned from his fateful cross-country journey and since the first JLG aerial platform entered the marketplace. As of today, the business has expanded itself into a number of global markets and continues to develop contemporary equipment to guarantee that clients are able to become safer and more resourceful within their workplace.
