

## Meritor Part

Meritor Parts - Meritor is a premier global supplier which is proudly built on a 100 year tradition of quality and service. They concentrate on various integrated systems, modules and parts to original machine manufacturers and the aftermarket for the transportation and industrial sectors.

Meritor prides itself in the company's unique energy and believes that this particular energy contributes to their competitive advantage in the worldwide operations. The company values their clients and would like to guarantee their success while anticipating their various requirements. Meritor begins with a philosophy which values diversity of individuals and their broad thought processes. Operating in 19 countries and employing more than 11,200 people, Meritor encourages collaboration and innovation among a team of knowledgeable experts.

Meritor strongly believes in only hiring future focused employees. These top-caliber people could quickly get used to to changing surroundings and freely demonstrate the level of performance and commitment considered necessary in order to attain results for the competitive market environment. The company empowers their teams to make sound business decisions so as to enhance the overall success of the business. In return, Meritor provides all of their employees various possibilities for professional and personal growth.

Their Advanced Engineering team is at the forefront of components and system engineering which include axles, drivelines, braking and suspension systems utilized for medium and heavy duty trucks, trailers, off-highway vehicles, buses and military vehicles. The Meritor Advanced Engineering team is growing. They opened a new technical center in Bangalore, India in September 2009 in order to lead their advanced product development initiatives that represent the whole Asia Pacific region. This team is also responsible for supporting the requirements of their international engineering staff.

Meritor's customer focused and dynamic Quality team is devoted to ensuring optimum processing at their aftermarket distribution facilities and production plants that are located all around the globe in 19 nations and in 5 different continents.

The supplier development network is specifically located to support new business growth. Regional teams are supported by worldwide initiatives, quality systems and centralized specialties in Materials Engineering and Six Sigma. Meritor's growing Six Sigma program encourages a data-driven, fact-based approach to decision making within every part of the trade. The DFSS or also referred to as Design for Six Sigma ensures product reliability in each region. The team is also included transactional Green Belts who use Six Sigma tools to business methods and implement lean techniques.
